$\qquad$
$\qquad$
UNIT 5
a) $1,3,5,7$ $\qquad$ , __, $\qquad$ b) $4,8,12,16$

## AIM: ARITHMETIC SEQUENCE

$\qquad$
$\qquad$
$\qquad$

A $\qquad$ is an ordered set of numbers. Each number in the sequence is called a $\qquad$ .

1. Identify a pattern in the sequence and then find the missing terms:

3, 6, 9, 12, 15, 18, $\qquad$
$\qquad$ ,__
.

## Rule:

3. The table below shows Eva's monthly DVD rental from Netflix.
a) How many DVD's per month does Eva rent from Netflix?
b) After five months how many DVD's did Eva rent?

| Eva's DVDs |  |
| :---: | :---: |
| Month | DVDs |
| 1 | 3 |
| 2 | 6 |
| 3 | 9 |
| 4 | 12 |

c) Write the table as a sequence.
2. Identify a pattern in the sequence and then find the missing terms :

48, 42, 36, 30, $\qquad$

## Rule:

4. As shown in the table, the monthly rent of an apartment depends on the number of bedrooms.
a) What is the cost to rent each additional bedroom?
b) What will be the cost of a four bedroom apartment?

| Bedrooms | Rent |
| :---: | :---: |
| 1 | $\$ 550$ |
| 2 | $\$ 625$ |
| 3 | $\$ 700$ |

c) Write the table as a sequence.

In an $\qquad$ , the amount by which the terms change each time is
called the $\qquad$ . The common difference is represented by $\qquad$ .

* In an arithmetic sequence, you are either $\qquad$ or $\qquad$
to find the next term!

5. Consider a sequence that follows $\mathbf{4}, \mathbf{7}, \mathbf{1 0}, \mathbf{1 3}, \mathbf{1 6}, \ldots$.
a. What is the first term?
b. What is the common difference?

| Term <br> Number <br> "n" | Term |
| :---: | :---: |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

6. Consider a sequence that follows $\mathbf{- 7}, \mathbf{9},-\mathbf{1 1}, \mathbf{- 1 3}$
a. What is the first term?
b. What is the common difference?

| Term <br> Number <br> "n" | Term |
| :---: | :---: |
|  |  |
|  |  |
|  |  |
|  |  |

7. Consider a sequence that follows $\mathbf{3}, \mathbf{7}, \mathbf{1 1}, \mathbf{1 5}, 19 \ldots$
a) What is the first term?
b) What is the common difference?
c) Fill in table.
d) Graph the table

What would the equation of this graph be?.... Hint lets use our calculator!
$\qquad$ pattern!

## PRACTICE PROBLEMS

8. Is the following sequence arithmetic: $\mathbf{2}, \mathbf{5}, \mathbf{7}, \mathbf{1 5}, \mathbf{1 6}, \mathbf{2 0} \ldots$ Explain your answer.
9. Consider a sequence that follows: $\mathbf{1 8}, \mathbf{1 4}, \mathbf{1 0}, \mathbf{6}, \mathbf{2} . . . . .$.
a) What is the first term?
b) What is the common difference?
c) Fill in table.
d) Graph the table

| Term <br> Number <br> "n" | Term |
| :---: | :---: |
|  |  |
|  |  |
|  |  |
|  |  |
|  |  |

10. Consider a sequence that follows: $\mathbf{3}, \mathbf{9}, \mathbf{1 5}, \mathbf{2 1} . . . . .$.
a) What is the first term?
b) What is the common difference?
c) Fill in table.
d) Graph the table

| Term <br> Number | Term |
| :---: | :---: |
|  |  |
|  |  |
|  |  |
|  |  |

11. Using your calculator, go back and find the equation of the line for \#9 and \#10!
